

**NEW
Wide Body
Press**

Introducing **LP-580U** Body Shirt Press

LP-580U Facts

- *larger pressing surface.....WHY.....to handle those hard to press oversized shirts but its special design can also press all sizes too.*
- *loves short sleeve shirts.....WHY.....because our unique short sleeve design makes it easy for operators to load.*
- *uses Side Expanders along with special (patent pending) designed padding with side air bags.....WHY.....our side expanders open early applying soft tensioning which prevents wrinkles in the side of the shirt.*
- *our Shoulder Press is standard equipmentWHY.....only press in the industry that can offer a perfect finish in this area of the shirt.*
- *Tail Clamp feature.....WHY.....because our unique and industry only Tail Clamp design allows for quicker loading and also improves the pressing quality of the back of the shirt.*
- *uses Silicone Base Pads.....WHY.....extends cover and pad life while providing the best possible vacuum.*
